# NATIONAL NETWORK INVITATION SUMMIT WORKSHOP

**THURSDAY 21 FEBRUARY 2019**

## HOW TO BECOME A SMART FACTORY.

### Smart Factories Are Not Coming... They're Already Here!

Empirical evidence has shown that those manufacturers who've embarked on smart factory projects have reaped huge rewards:

- ✓ **Improved efficiencies**
- ✓ **Reduced waste**
- ✓ **Higher customer satisfaction**
- ✓ **Traceability and product genealogy**
- ✓ **Healthier P&L**
- ✓ **Increased supply chain visibility**

The availability of 'open' systems in automation as well as access to various sources of information, provides manufacturers with unprecedented opportunity for site-wide integration. This results in end-to-end visibility of the internal supply chain as well as opportunities for *vertical* and *horizontal* integration within the plant, moving action to real-time (proactive), rather than after the event (reactive).

Leadership, investment in key infrastructure, knowing what to ask equipment vendors and how to create a stable, high-availability landscape all underpin the technology platform. What's also needed is investment in people, the change management processes and training.

**Join John Broadbent at this workshop and learn how to turn your plant into a "smart factory", and improve your profitability.**

### EVENT INFORMATION

<b>VENUE</b>	Park Royal Hotel, Melbourne Airport Tullamarine VIC
<b>HOST</b>	John Broadbent, Director Realise Potential, Smart Factories Mentor
<b>DATE</b>	Thursday 21 February 2019
<b>TIME</b>	1:00pm - 4:30pm
<b>FEES</b>	\$450+GST Best Practice Network Members \$750+GST Non members

### YOUR HOST

**John Broadbent** has over 40 years' experience in manufacturing, with the last 20 dedicated to helping businesses of all sizes, utilise smart factory concepts. He's seen first-hand the positive change these investments have made, both on profitability, longevity and culture.

His passion and experience are valued by organisations such as Coca-Cola, Sanitarium, Frucor Beverages, Parmalat, Tomago Aluminium, CSR as well as industry bodies. John is also an Adjunct Professor of Eng at UTS, specifically responsible for industry liaison for smart manufacturing and Industry 4.0.
