

IMPLEMENTING LEAN IN YOUR BUSINESS

A unique, highly interactive one-day workshop. It's real life, hands-on, practical and engaging.

Most organisations struggle to sustain their Continuous Improvement / Lean Journey implementation over a period of time.

Whether it is called Lean, Operational Excellence, or some other name these initiatives do flounder for a multitude of reasons. This Special Interest Group will examine the fundamentals of lean thinking and how to lead and sustain your continuous improvement efforts in your organisation.

"It's about valuing your people to contribute in a new way. Lean is a set of principles and techniques that eliminate waste and deliver to our customers exactly what they need, when they need it, in the quantity they need, in the right sequence, without defects, and at the lowest possible cost." - Anthony Clyne

This workshop will be facilitated by Anthony Clyne, Consulting Director at TXM Lean Solutions. Anthony has acquired a deep understanding of Lean Manufacturing over a 25 year period and has a proven track record of implementing Continuous Improvement programs with major organisations across the globe.
